Dear David:

Your stereo program was very well received in St. Louis and all of us appreciated the enormous effort you made to travel with so much heavy equipment. Your collection of stereos is fantastic and your detailed knowledge of them is even greater.

You were nice enough to surprise me with the Franklinesque book which has so many "bon mots" that I know what to do in any situation. My wife devoured it as well. Many thanks.

As to the 5 stereos I borrowed from you to see if I had them in our collection. I found one we did not have. I am returning herewith the other four. Do you collect each distributor for the same picture? I do not think I have a picture you do not have, but I could have a different distributor, rounded versus flat top corners, different color background, curved versus flat card, etc. which you may not have if you collect such varieties. Let me know.

As to your New Hampshire work and collecting with Dave you have a very difficult problem with the 1775 NH issues as I believe one member of the family used the same printing forms as the later member who illegally printed the so called counterfeits. I would appreciate what you know as I am preparing a fifth edition of the Early Paper Money Of America and am frustrated on that topic.

It was a pleasure to see you. Let's do it more often.

Sincerely,

am

Eric P. Newman
